IOS ANTI-PATTERNS

Learning by repeated failure

Dave Weston dweston@microsoft.com http://github.com/dtweston

Hello my name is

MOBILEAPPSARE EVERYMHERE

APPS ARE MORE

APPS STAND

FAILURES

(and successes)

HUGE VIEW CONTROLLERS

VIEW CONTROLLERS ARE GLUE

@implementation YMFeedViewController

```
#pragma mark - Header view
#pragma mark - fetching helper methods
#pragma mark - View lifecycle
#pragma mark - private methods
#pragma mark - Table view delegate
#pragma mark - Table view data source
#pragma mark - UIScrollViewDelegate
#pragma mark - YMFeedCellDelegate
#pragma mark - YMCardCellDelegate
#pragma mark - YMScrollableImageAttachmentViewDelegate
#pragma mark - YMThreadViewControllerDelegate
#pragma mark - iPad group transitions
#pragma mark - YMFetchedResultsTableControllerDelegate
```

@end

MOVE VIEW CODE OUT OF THE VIEW CONTROLLER

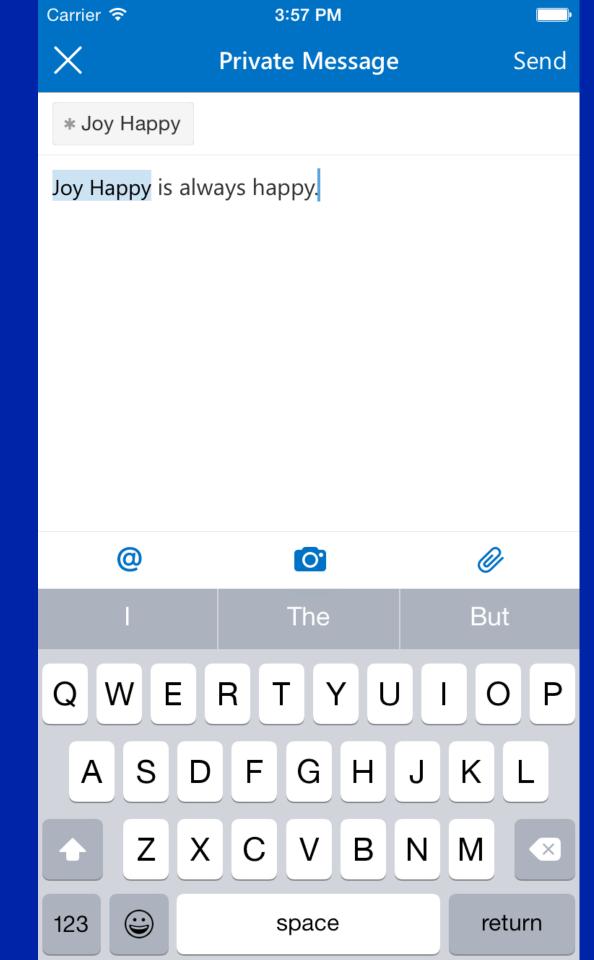

SignupViewController => SignupViewController + SignupView

SPLITTING RESPONSIBILITIES IS GOOD

```
@interface YKSignupView : UIScrollView
@property (nonatomic, strong) UILabel *firstNameLabel;
@property (nonatomic, strong) UILabel *lastNameLabel;
@property (nonatomic, strong) UILabel *emailLabel;
@property (nonatomic, strong) UILabel *passwordLabel;
@property (nonatomic, strong) YKErrorLabel *firstNameError;
@property (nonatomic, strong) YKErrorLabel *lastNameError;
@property (nonatomic, strong) YKErrorLabel *emailError;
@property (nonatomic, strong) YKErrorLabel *passwordError;
@property (nonatomic, strong) YKSimpleTextField *firstNameField;
@property (nonatomic, strong) YKSimpleTextField *lastNameField;
@property (nonatomic, strong) YKSimpleTextField *emailField;
@property (nonatomic, strong) YKSimpleTextField *passwordField;
@property (nonatomic, strong) YKSimplePrimaryButton *signupButton;
@property (nonatomic, strong) UILabel *termsOfUseLabel;
@property (nonatomic, strong) UIButton *termsOfUseButton;
@property (nonatomic, strong) YMKeyboardLayoutHelperView *keyboardHelper;
- (void)centerOnView:(UIView *)view;
```

@end

... DOIDETECT A HOWEVER?

AND NOW THE COMPOSER

- ▶ Address bar at the top
 - ▶ Text view
 - **▶** Tool bar at bottom

```
- (BOOL)isMessageBodyEmpty
   return [self.composeTextView isEmpty];
- (NSString *)messageBodyText
   return [self.composeTextView originalText];
- (void)setMessageBodyText:(NSString *)text
   self.composeTextView.text = text;
- (NSAttributedString *)messageBodyAttributedText
   return self.composeTextView.attributedText;
- (void)setMessageBodyAttributedText:(NSAttributedString *)attributedText
   self.composeTextView.attributedText = attributedText;
```

```
- (void)mentionableTextView:(YMMentionableTextView *)mentionableTextView didAddMentionedUser:(YDUser *)user
{
    [self.composeViewDelegate composeView:self didAddMentionedUser:user];
}
- (void)mentionableTextView:(YMMentionableTextView *)mentionableTextView didRemoveMentionedUser:(YDUser *)user
{
    [self.composeViewDelegate composeView:self didRemoveMentionedUser:user];
}
- (void)mentionableTextView:(YMMentionableTextView *)mentionableTextView didPasteImageData:(NSData *)data{
    [self.composeViewDelegate composeView:self didPasteImageData:data];
}
```

OTHER SOLUTIONS?

SEPARATE DATA SOURCES FROM VIEW CONTROLLERS

PARENT/CHILD VIEW CONTROLLER RELATIONSHIPS

VIEWS THAT UNDERSTAND THE MODEL LAYER

WE'RE DOOMED WE'RE ALL DOOOOOMED

NSObject CONTROLLERS

TESTS

PLAN 1 KIF (KEEP IT FUNCTIONAL)

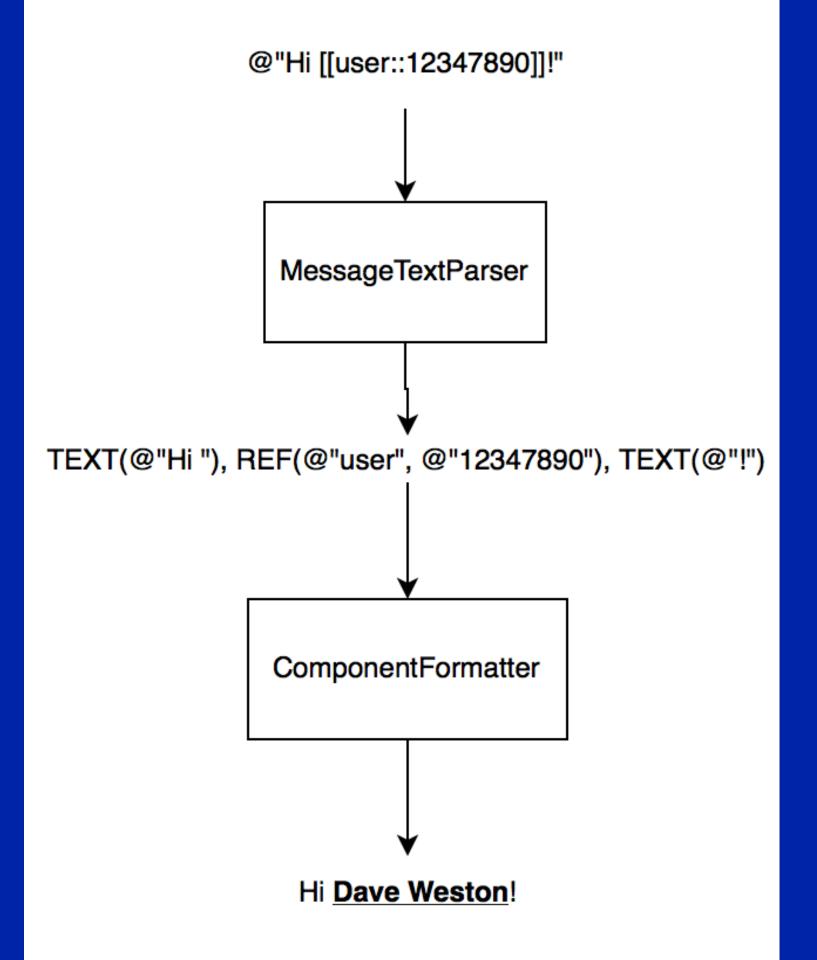

PLAN 2 KIWI (BDD TESTING)

```
describe(@"Math", ^{
    context(@"Addition", ^{
        it(@"is commutative", ^{
            [[theValue(3+2) should] equal:theValue(2+3)];
        });
    });
});
```

MORE/BETTER TESTING HOW TO IMPROVE TEST COVERAGE?

TWO OPTIONS

- bigger tests, more setup
- smaller units to be tested

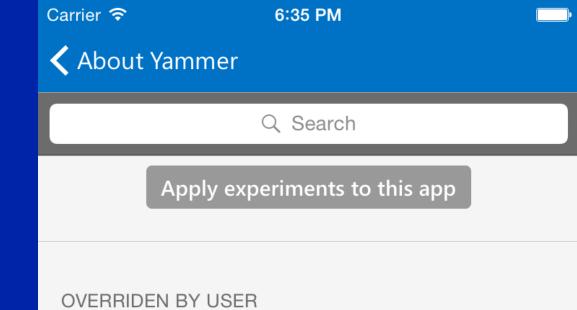

MESSAGE FORMATTING

MENTION DETECTION

```
describe(@"YMMentionDetector", ^{
   it(@"detects mentions due to capitalization", ^{
   });
   it(@"detects mentions due to @ symbol", ^{
   });
   it(@"detects mentions when the cursor is moved back", ^{
   });
   it(@"detects symbol mentions when they are at the beginning of the text.", ^{
   });
```

NOT ALL CODE CHANGES HAPPEN AT THE SAME RATE

SCIENCE

ios_inline_at_mentioning_v3

31373 inline @mentioning and @button toggle *inline mentioning with @ button
